## HALOX REACH Compliance Update

For some time now, HALOX has been preparing for the new EU chemicals legislation, **REACH** (Registration, Evaluation and Authorization of Chemicals), with full intentions to adhere to all requirements in order to sustain products in the European marketplace.

To this end, C.S.B. GmbH, HALOX's Only Representative (OR), has verified that all of the chemicals HALOX exports to the EU have been successfully pre-registered with the European Chemicals Agency in Helsinki (ECHA) and that none of these chemicals are substances on ECHNA's "Candidate List of substances of very high concern". At this stage HALOX intends to register all chemicals within our products in accordance with the schedule provided by the legislation.

Please understand that the REACH regulation does not require HALOX to provide downstream users with the pre-registration numbers for the chemicals HALOX is importing into the EU and HALOX has been advised by our OR that this is not necessary. If you are asked by competent authorities to provide pre-registration numbers please contact our OR.

If you need information regarding this matter, feel free to contact us, [techservice@halox.com](mailto:techservice@halox.com), or our Only Representative:

Heinz W. Dobbertin -General Manager  
C.S.B. GmbH  
Oberstrasse 10
