

Are you overwhelmed by projects?

Our Technical Service Department is here to help!

HALOX® offers a full service corrosion testing facility featuring top-of-the-line equipment to perform ASTM B117 Salt Spray, ASTM D5894 QUV Condensation and QUV/Prohesion, ASTM D2247 Humidity, Flash Rust, Filiform and Electrochemical Impedance Spectroscopy (EIS) testing.

HALOX® also offers a full-service technical laboratory with highly trained specialists to work with your formulations and can help you create a *NEW* solution for an existing customer.

If your projects are piling up, contact our Technical Services Department at techservice@halox.com for assistance. We guarantee a prompt response to your corrosion inhibition needs. We can help identify an optimum inhibitor package to suit your customer's budget.
